

Energy Efficiency is a Win-Win.

At Avista, we make choices everyday about the best and most affordable source of power to deliver to our customers. Energy efficiency gives us one more choice—providing us with the lowest cost “new” resource available.

Energy efficiency helps customers reduce their energy use during a time when energy costs continue to rise. Long-term, using less energy helps customers by allowing us to delay building or acquiring more expensive generation. And, using our resources wisely has a positive impact on our community and on our environment.

Cost of Energy (per kilowatt hour)

Reducing energy use via energy efficiency	\$.02–\$.03
---	--------------------

Purchasing or generating new power	\$.05–\$.11
------------------------------------	--------------------

Looking for rebates? We have 'em.

We offer a variety of programs, rebates and other incentives to help our customers make their homes more energy efficient.

To find out more about the available rebates, visit everylittlebit.com/findrebates. Once you are there, you'll be able to quickly and easily search the database for energy and money saving opportunities.
