**SAVE UP TO
\$100
A YEAR ON
ELECTRICITY**

Recycling an old fridge can save you up to \$100 a year in energy costs—and it doesn't take any energy at all. We'll pick it up for free and you'll pick up \$30. Plus you'll reduce your energy use while keeping harmful materials out of landfills. And the only finger you have to lift is your dialing finger.

For a FREE pickup, call 1-877-577-0510 or visit www.avistautilities.com (keyword search: fridge)

*Refrigerators and freezers must be in working condition, pre-1995 and must be a minimum of 10 cubic feet in size, utilizing inside measurements. Avista contracts with JACO Environmental, an appliance recycler, to pick up and recycle refrigerators and freezers. This program is funded by Avista and is available to its residential electric customers in Washington and Idaho. Customers must own the unit(s) being recycled. Limit two units per residential address. A check will be mailed to the Avista customer within 4-6 weeks after the appliance collection. Some restrictions apply. © Avista Corp. 2011
